### **Search Notes**

Dear Examiner Beliveau,

Please find attached the search results for 09/761139. I used the search strategy I emailed you to edit, which, you did. I searched the standard Dialog files and the Internet.

If you would like a refocus search, please let me know.

Thank you

**Interactive TV offerings set to grow Consumers still fuzzy on concept**

ABSTRACT: The mystery for consumers is what exactly constitutes interactive **TV**. Meaning shifts from vendor to vendor, but a barrage of features are arriving. For instance, **interactive program guides** allow viewers to select channels by genre or even with a particular actor in mind, while **Video on Demand** lets viewers access programming that can be **shown** at any **time** --pause, rewind or fast-forward.

**What's the Right Gizmo for TV Interactivity? It All Depends**

ABSTRACT: The easiest interactive **television** systems to use are those that are built into the **set - top box** that comes with all satellite and some cable services. People with relatively late-model boxes...

...seeing interactive features popping up. Perhaps the most common interactive systems in use today are **electronic program guides**, which let viewers see when programs are playing and order movies on satellite and a...

...path to buying pay-per-view movies, which on sophisticated systems can be ordered to **begin** at any **time** and can also be paused, rewound and replayed like videocassettes. The guides are also showing signs of evolving into **television** portals, complete with shopping. **STAND-ALONE SYSTEMS** -- Viewers whose cable companies do not offer interactive features or who want the latest features can choose between two services, **WebTV** and **AOLTV**, which add interactivity to any **television**, as long as it's near a phone line. Both offer e-mail and Web surfing, and both offer interactive features synchronized to certain **television** programs. **AOLTV** also lets

users chat and send instant messages to anyone logged on to any of America Online's services. **WebTV** costs \$100 to \$150 for the box and \$25 a month for the service. The...

Generation system for information display schedule for electronic  
program guide - ...

...using data processor in playback system to receive and store television

program schedule data which is output at certain frequency in desired time interval

...Abstract (Basic): In the system for generating an **electronic programme guide** for transmission on a television channel, the method for creating a schedule for display of...

...first time slot is set up in the time interval and commences concurrently with the **start** of the **time period**.

...Abstract (Equivalent): A system for providing an **electronic television programming guide** on a television channel comprising...

...means for receiving television **program schedule** information for a plurality of television programs...

...a multimedia generator for receiving said television **program schedule** information and said control commands from said data processing means and generating, in response to said control commands, a first viewable display comprising a portion of said television **program schedule** information in **grid** format, said viewable **display** comprising program titles for a first plurality of television channels and a plurality of time...

...and a second viewable display comprising a portion of said television **program schedule** information in grid format, said second viewable display comprising program titles for a second plurality...

...A system for providing an **electronic television programming guide** on a television channel comprising...

...means for receiving television **program schedule** information for a plurality of television **programs**, said **program schedule** information comprising **program** title information, said program title information comprising abbreviated titles and complete titles...

...a multimedia generator for receiving said **program schedule** information and said control commands from said data processing means and generating, in response to said control commands, viewable displays of television **program schedule** information in a grid comprising grid cells, said grid cells comprising program title information, wherein said multimedia generator generates a first viewable display of television **program schedule** information for a first plurality of television channels and a plurality of time slots, and a second viewable display of television **program schedule** information for a second plurality of television channels and said plurality of time slots, said...

...by said data processing means from said program title information in accordance with the available **display** space in said **grid** cells...

...In a system for providing an **electronic program guide** for transmission on a television channel, a method for generating a schedule for display of...

...first time slot in said time period, said first time slot commencing concurrently with the **beginning** of said **time period**,

**Pay TV selected digital word television programme display system having selection criteria sampler decoder receiver memory stored and user applied setting filtered TV display grid .**

Abstract (Basic):

... The pay television sampling process has a **display grid** of TV programmes transmitted by a processing centre to televisions with video text decoders. An...

...to that required by the user, the filtering is applied and is displayed as a **programme grid** .

**Video information retrieval system for cable television , changes  
program data displayed on different axis of grid format display based  
on user input**

Abstract (Basic):

... and an operating software from headend, and executes the  
software to process received data. A **program guide** display of  
decoded data is generated in a **grid** format. The guide **display**  
changes program data displayed on different axis based on user input.  
... In cable **television** system...

...Enables a viewer to access continually updated information such as  
**program guides** , **sports** activities, weather, financial reports,  
etc., as the program displayed in different grid axis is changed...  
...Title Terms: **TELEVISION** ;

**Pay TV selected digital word television programme display system  
having selection criteria sampler decoder receiver memory stored and user**

applied setting filtered TV display grid .

Abstract (Basic):

... The pay **television** sampling process has a **display grid** of **TV** programmes transmitted by a processing centre to televisions with video text decoders. An input index...

...to that required by the user, the filtering is applied and is displayed as a **programme grid** .

... Method of filtering digital words for display in a pay **TV** system...

...Provides a better solution for pay **television** viewers who wish to sample programmes before viewing using a remote control...

...Title Terms: **TELEVISION** ;

**Generation system for information display schedule for electronic  
program guide - ...**

**...using data processor in playback system to receive and store  
television program schedule data which is output at certain**

frequency in desired time interval

...Abstract (Basic): In the system for generating an **electronic programme guide** for transmission on a **television** channel, the method for creating a schedule for display of information involves providing database items...

...Abstract (Equivalent): A system for providing an **electronic television programming guide** on a **television** channel comprising ...

...means for receiving **television program schedule** information for a plurality of **television** programs...

...a multimedia generator for receiving said **television program schedule** information and said control commands from said data processing means and generating, in response to said control commands, a first viewable display comprising a portion of said **television program schedule** information in **grid** format, said viewable display comprising program titles for a first plurality of **television** channels and a plurality of time slots...

...and a second viewable display comprising a portion of said **television program schedule** information in **grid** format, said second viewable display comprising program titles for a second plurality of **television** channels and said plurality of time slots...

...said data processing means causes said multimedia generator to fade out said first plurality of **television** channels and associated titles and fade in said second plurality of **television** channels and associated titles...

...A system for providing an **electronic television programming guide** on a **television** channel comprising...

...means for receiving **television program schedule** information for a plurality of **television** programs, said **program schedule** information comprising **program** title information, said **program** title information comprising abbreviated titles and complete titles...

...a multimedia generator for receiving said **program schedule** information and said control commands from said data processing means and generating, in response to said control commands, viewable displays of **television program schedule** information in a **grid** comprising **grid** cells, said **grid** cells comprising **program** title information, wherein said multimedia generator generates a first viewable display of **television program schedule** information for a first plurality of **television** channels and a plurality of time slots, and a second viewable display of **television program schedule** information for a second plurality of **television** channels and said plurality of time slots, said second plurality of **television** channels differing from said first plurality of **television** channels...

...by said data processing means from said **program** title information in accordance with the available **display** space in said **grid** cells...

...In a system for providing an **electronic program guide** for transmission on a **television** channel, a method for generating a schedule for display of information, said method comprising the...

#### ABSTRACT

PROBLEM TO BE SOLVED: To attain the avoidance of selection without the recognition of **lapse** of **time** after the broadcasting start of a PPV (pay per view) program by displaying a mark...

... area of a display screen, and program guide picture generating processing is finished. Thus, the **lapse** of **time** from the start of current broadcasting program can be recognized, and the PPV program can be prevented from being selected and viewed without recognizing the **lapse** of **time** from the start of this program.

Detailed Description

Claims

Detailed Description

**PROGRAM GUIDE SYSTEM WITH**

**VIDEO- ON - DEMAND BROWSING**

Back(around of the Invention

This invention relates to interactive

5 **television** program guides, and more particularly, to

**television** program guides that allow viewers to browse

**video - on - demand** programs. A **television program** and a

program **guide** display containing information for **video**

**on - demand** programs may be simultaneously displayed on a

10 display screen.

Throughout the history of **television**,

broadcasting networks have been striving to provide

television viewers with interesting programming **shown**

at convenient viewing **times**. This has proven to be a

15 difficult task given the vast diversity of the...

Claim

... viewer to

enter a parental control code to order the video-ondemand program.

19 The **interactive** television program guide

system defined in claim 1 wherein the system further

comprises:

means for placing an order for a video-on

demand program displayed in the program guide display;  
means for selecting a start - time for a video  
on-demand program ordered by a viewer; and  
means for automatically starting said ordered  
video - on - demand program at said viewer selected starttime.

20 The interactive television program guide  
system defined in claim 19 wherein the system further  
comprises means for reminding said viewer of said  
start - time for said ordered program. - 31

21 The interactive television program guide  
system defined in claim...in claim 19 wherein the system further  
comprises:  
means for reminding said viewer of said  
start - time for said ordered program; and  
means for providing said viewer with an  
option to cancel said ordered program.

27 An interactive television video - on  
demand program guide system implemented on viewer  
television equipment having a main display screen  
comprising:  
means for displaying a program guide display  
on...

...on-demand program listing;  
means for ordering a video-on-demand program  
represented by said video -on-demand program listing;  
and  
means for allowing a viewer to advance order  
said video...

...program by  
selecting said start-time from a list of start-times  
provided by said program guide .

30 The interactive television program guide  
system defined in claim 27 wherein the system further  
comprises means for allowing a viewer to select a  
start-time for said video - on - demand program by entering  
said start-time with a set of numeric input keys on a  
remote control.

31 The interactive television program guide  
system defined in claim 27 wherein the system further  
comprises means for storing at least a portion of said  
video -on-demand program in a home storage device when  
said viewer advance orders said video...system defined in claim 27  
wherein the system further  
comprises:  
means for selecting a start- time for a video  
on-demand program ordered by a viewer;  
means for reminding said viewer of a selected  
start - time for said ordered video - on - demand program;  
and  
means for allowing said viewer to watch said  
ordered program immediately from said reminding means.

37 The interactive television program guide

system defined in claim 27 wherein the system further comprises:  
means for selecting a **start - time** for a **video on - demand** program ordered by a viewer;  
means for reminding said viewer of a selected **start - time** for said ordered video-on-demand program;  
and  
means for allowing said viewer to acknowledge said **start -time** indicated by said reminding means and subsequently watch said ordered program at said selected...

...demand program ordered by a viewer;  
means for reminding said viewer of a selected **start-time** for said ordered video-on-demand program;  
and  
means for allowing said viewer to change said **start - time** indicated by said reminding means to a new **start - time**, said ordered **video -on- demand** program automatically starting at said new **start - time**.

39 The interactive television program guide system defined in claim 27 wherein the system further comprises:  
means for selecting a **start - time** for a **video on - demand** program ordered by a viewer;  
means for reminding said viewer of a selected **start - time** for said ordered video-on-demand program;  
and  
means for allowing said viewer to change said **start - time** indicated by said reminding means to a new **start - time** by selecting said new **start - time** from a list of **start - times** provided by said **program** guide, said ordered video-on-demand program automatically starting at said new **start - time**.

40 The interactive television program guide system defined in claim 27 wherein the system further comprises:  
means for selecting a **start - time** for a video **on - demand** program ordered by a viewer;  
means for reminding said viewer of a selected **start - time** for said ordered video-on-demand program;  
and  
means for allowing said viewer to change said **start -time** indicated by said reminding means to a new start-time by entering a viewer-defined start-time, said ordered video- **on - demand** program automatically starting at said viewer-defined start-time.

41 The **interactive television program guide** system defined in claim 27 wherein the system further comprises:  
means for selecting a start-time for a **video on - demand** program ordered by a viewer;  
means for reminding said viewer of a selected start-time...

...said viewer to cancel said ordered program indicated by said reminding means.

42 An interactive **television video - on demand program guide** system implemented on viewer **television** equipment having a main display screen comprising:  
means ...method defined in claim 67 wherein  
said starting further comprises:  
reminding said viewer of said **start - time** for  
said ordered program; and  
providing said viewer with an option to  
cancel said ordered program.

75 A method for providing an interactive **television video - on - demand program guide** system implemented on viewer **television** equipment having a main display screen comprising:  
displaying a program guide display on the viewer...for a video-on-demand program ordered by a viewer;  
reminding said viewer of said **start - time** for said ordered program; and  
allowing said viewer to cancel said ordered program indicated by said reminding means. - 47

90 A method for providing an interactive **television video - on - demand program guide** system implemented on viewer **television** equipment having a main display screen comprising:  
displaying a program guide display on the viewer...

Detailed Description

... display

and linking of video promotions with program schedule information  
and order processing functions.

The **prior** electronic program guides also fail to provide  
5 the user with a simple and...90 minute cells  
may require only one line of text to display the title.

The **prior electronic program guides** also lack a method  
for creating a viewing itinerary electronically while still  
viewing a program currently appearing on the television receiver.  
25 Moreover, these **prior program guides** leave much guess work for  
the  
user as he navigates through a sequence of channels...

...SPECIFICATION display and linking of video promotions with program  
schedule information and order processing functions.

The **prior** electronic program guides also fail to provide the user  
with a simple and efficient method...

...programs and channels using a flexible and uncomplicated on-screen user  
interface.

The prior electronic **program guides** are also deficient in that they  
do not provide the user with the ability to...

...the user with current billing information on the user's demand.

An additional problem with **prior program guides** is that when  
**displaying** schedule information in grid format, i.e., columns  
representing **time slots** and rows representing channels, program  
titles generally are width-wise truncated to fit into the...

Detailed Description

Detailed Description

... display

and linking of video promotions with program schedule information  
and order processing functionse

The **prior** electronic program guides also fail to provide  
the user with a simple and efficient...

...programs and channels using a

flexible and uncomplicated on-screen user interface.

The prior electronic **program guides** are also deficient  
in that they do not provide the user with the ability to...

...the user with current billing information  
on the user's demand.

An additional problem with **prior program guides** is that  
when **displaying** schedule information in grid format, i. e., , columns  
representing **time slots** and rows representing channels, program  
titles generally are width@wise truncated to fit into the...
